

Cyber Vigilance

Managed Security Services

Cyber Vigilance

Managed Cyber Security Services

Key Benefits

- ▶ A fully managed service backed by a 24x7 SOC.
- ▶ Technology powered by the leading solutions.
- ▶ Consistent security awareness training for employees provided by the world's largest security awareness training platform with NCSC approved content.
- ▶ Monthly reporting on your company's risk level with actions for improvement.
- ▶ An affordable, fixed fee.
- ▶ Rapid deployment.
- ▶ Access to a dedicated team to support you when you need it.

Around 65,000 attempts to hack small- to medium-sized businesses occur in the UK every day, around 4,500 of which are successful. That equates to around 1.6 million of the 5.7 million SMBs in the UK per year.

On top of this, 38% of UK organisations have lost customers and businesses due to cyber security related issues.

What is Managed Cyber Security?

Cyber Vigilance's managed service is specifically designed to help organisations improve their security with comprehensive protection and reduce cost, time, and stress.

Our services address two key areas: People and Technology to deliver an effective cyber security defence.

You will receive straight to the point monthly reports to quickly see how your cyber security posture is improving without the complicated language, giving you complete visibility into your protection. You will also get access to our dedicated team of security professionals who will help you on your cyber security journey and guidance on your next steps. We've got your back...

Why Choose Managed Services?

The need to have comprehensive cyber security has become increasingly vital due to advancing threats and pressure from supply-chains and regulators. For many organisations, cyber security is considered an afterthought which takes away from their core operations. Technology can be expensive when you buy solutions separately, which also requires your staff to be trained for the different solutions. Not only this, but the impact it can have on your business, due to the time it takes to get your systems back running normally and the effect it could have on potential customers if you are breached.

By choosing a managed service, you have access to leading solutions, managed by a highly skilled team, who act as an extension of your own team. You will save on time, stress and the costs associated with building your own security stack.

Cyber Vigilance

Managed Cyber Security Services

Technology

Technology is the core of our managed security service. A key benefit of opting for a managed service is that you can access best-of-breed technology at an affordable price, which is not always available to every business due to minimum endpoint requirements and cost.

MONITORING & CONTROL

- File Integrity Monitoring
- Inventory Management
- Log Collection and Retention
- Vulnerability Assessment

RESPONSE ORCHESTRATION

- Pre-set Remediation
- Custom Remediation
- Automated Playbooks

PREVENTION & DETECTION

- Next-Gen Anti-virus
- Network Analytics
- Endpoint Detection and Response
- Deception
- User Behaviour Analytics

SOC SECURITY SERVICES

- Threat Intelligence
- Threat Hunting
- Incident Response

People

Although many organisations feel technology is the main focus of cyber security, neglecting the need to have a safety conscious and aware workforce can have just as significant an impact. Around half of the UK's cyber attacks involve phishing, roughly 20% higher than the global average.

AWARENESS TRAINING

- Baseline security awareness training.
- Remedial training campaigns.
- Role-specific training content.
- 'Security Hints and Tips' subscription.

REPORTING

- Monthly reporting on the month's campaigns.
- Visibility of riskiest users.
- See your yearly progress.

SIMULATED PHISHING

- Simulated phishing campaigns.
- Real-time phishing examples.
- Easily report suspicious emails with the 'Phish Alert Button'

Reports

We provide you with straight-to-the-point monthly reports to give you complete visibility into how you are being protected. Our monthly reports equip you with the information you need to demonstrate to your board, customers and employees that you are taking security seriously.
